

MEET YOUR SPECIALS TEACHERS

Mrs. Christine Antmann, Music

In music class, we will continue to learn about the basic elements of music. We will sing, do movement activities, practice rhythm and melodic notation, follow listening maps, and use body percussion. We will have fun and learn a lot about music throughout the year!

Mrs. Darlene Ashey, Library Media

Books, technology, and library resources are the keys that unlock your imagination! Our Library Media specials class focuses on the study of literature and research. Students also receive instruction in PowerPoint, Minecraft Education, coding and chess. My goal is to encourage independent exploration, creative production, and communication information and ideas!

Mrs. Glenda Robinson, STEM (Science, Technology, Engineering & Math)

STEM education extends well beyond simple computations. By using science, technology, engineering and mathematics concepts in my classroom, my students will become problem solvers as they investigate real world problems in the global sphere.

Coach Eric Saranik, Physical Education

It's time again to develop an active and healthy lifestyle! Boys and girls, get ready to run, jump and throw all day long. Students will learn about personal health and wellness, and demonstrate positive social skills.
