Dear Student:

You are to be commended for taking on the challenges of Advanced Placement Calculus. As you will soon realize, this is a demanding yet fulfilling experience. To help you pave the road to success, I have created a number of exercises to help you focus on skills and bodies of knowledge that are the foundations of success for AP Calculus. Please work all problems during the summer recess and be prepared to submit the assignment on the first day of school.

List of Assignments:

1. Library of Functions Worksheet; complete without a calculator
2. Fact of Fiction Worksheet; consider all possibilities before arriving at a conclusion.
3. Summer Worksheet One; work problems without a calculator, document work.

Please use a graphing calculator to solve the following problems. Solve all problems **accurate to three decimal digits** and verbally explain the procedures used for entering the information into the calculator. If you do not own a graphing calculator, and do not wish to purchase a TI-84 graphing calculator during the summer, you may download a graphing calculator emulator from the following link; <http://mrnagy.pbworks.com/Graphing-Calculator-Emulator>. This is an executable file and works with Windows platform only. If you elect to download, save first, then open the zip file.
