

EHS Coding Club

Learn - Code - Play

//No experience necessary//

Meeting on Tuesdays!

(First meeting is Sept. 5th)

-Room 412-

Text @ehscoders to 81010

for more information

About Us:

Coding Club has been around for several years, based on spreading knowledge of computer programming and website design. For anybody willing to learn computer code, we will be teaching Java and Python. We are always working on branching out to new subjects to keep things fun and interesting for members. Joining Coding Club is an exciting new way to learn a new skill for the future. Here, we learn, code, and play.

Plans for the Year:

In Coding Club, we will dedicate the first half of the school year to teaching members the skills needed to perform in different activities throughout the school year. Towards the winter months, our club holds a friendly in-school competition based around creating an in-text game. The winner receives a to-be-determined prize at the end of the competition. Throughout the year, we will also be participating in fundraisers to help generate money for the club, hopefully leading to the opportunity to go to a different variety of events.

Competitions:

Our main and most highly anticipated event is the in-text game competition that is hosted at the end of the year. We are always looking for new events to attend and learn from.

About joining:

Member fees are \$25 which includes the purchase of a club shirt, use of computers during club meetings, admission to all competitions, and several pizza parties throughout the year.

Current officers:

- President: Cassandra Garzia
- Vice President: Alan Madrid
- Secretary: Christian Sipe
- Treasurer: Haley Badillo
- Historian: Hunter Badillo
