

- Participation rates returned to near pre-pandemic levels in 2021-22 with 84.2% percent of 10th graders participating (86.1% participation in 2020).
- 2022 was the first-time 9th grades students testing fees were covered by the district. 85.8% of eligible 9th grade students participated.
- Broward participation for 10th grade students varied by race where White students (86%) participated at a slightly higher rate than Black (83%) and Hispanic (84%) students. For 11th grade, Black students (42%) participated at a slightly higher rate than Hispanic (36%) and White students (39%).
- Broward scores for 10th grade students were lower than Florida and national means for both EBRW and Math.
- Broward scores for 11th grade students were higher than state means in Evidence Based Reading and Writing (EBRW), but lower than national means on the EBRW scale and lower than both state and national means on the Math scale.
- Females outperformed males in EBRW and males outperformed females in Math.
- White students outperformed both Black students and Hispanic students in both EBRW and Math.
- 30,873 students who participated in PSAT/NMSQT in 2021-22 had not yet met the Algebra I graduation requirement. 11,397 students (36.9%) met the requirement via the PSAT 2021-22. This number is likely inflated by the impacts of the COVID-19 pandemic on previous years' state testing.

2021-2022 Participation

Notes and Additional Resources

- College-Ready benchmark scores are scores set by the College Board that indicate readiness to begin college coursework in specific subject areas after finishing high school. The College Board benchmark for EBRW NMSQT 10th grade is 430, for EBRW 11th grade is 460; for Math NMSQT 10th grade is 480; for Math 11th grade is 510.

SUBJECT: **PRELIMINARY SCHOLASTIC APTITUDE TEST (PSAT)/NATIONAL MERIT
SCHOLARSHIP QUALIFYING (NMSQ) TEST SCHOOL YEAR 2022**

This memo, the snapshot, and the attached appendices summarize student participation and scores from the Preliminary Scholastic Aptitude Test (PSAT)/National Merit Scholarship Qualifying Test (NMSQT), offered during school year 2022 to ninth, tenth and eleventh grade students, and to a small number of twelfth-grade students. The PSAT/NMSQT is administered by The College Board and provides essential feedback to students, educators, and parents on reading, writing, and mathematical skills essential for success in college-level coursework. Additionally, the PSAT provides students with early exposure to a college entrance-type tests (similar to the Scholastic Aptitude Test), and helps educators identify students to compete in the National Merit Scholarship Competition, as well as identifies students who may benefit from advanced course opportunities. The College Board provides an “Insights” report that assists teachers in identifying specific skill gaps and where additional instruction is needed. The College Board also provides a question-by-question breakdown that shows which questions each student is struggling with and where within the test they may be losing stamina, impacting their overall score. The Florida Department of Education (FDOE) covers the cost of participation for all 10th grade students in an effort to eliminate obstacles to participation by under-represented groups. During the 21-22 school year, for the first time, the District covered the cost of PSAT/NMSQT participation for all ninth-grade students at traditional schools. Participating students in other grades must pay to participate in the NMSQT or have their participation paid for by the school in which they are enrolled. A summary of PSAT/NMSQT outcomes are provided below and data summaries can be found in the appendices.

- Beginning in school year 2018-2019, scores of 430 or higher on the Math section of the PSAT/NMSQT earned concordance for the Algebra I graduation requirement. As of the test administration dates (10/13/21 and 10/26/21) 30,873 students in grades 9-12 still needed to meet Algebra 1 graduation requirements. Of those students, 11,397 scored 430 or higher on the Math section to meet the concordance graduation requirement. 3,055 of these students have not taken, or were enrolled but have not finished, Algebra 1; therefore they have not taken the Algebra End Of Course (EOC) Exam. The number of students who met concordance is likely inflated by the impacts of the COVID-19 pandemic on previous years state testing (see Appendices E and F).
 - 4,433 (24.1%) of 9th grade students met concordance through the PSAT/NMSQT
 - 5,005 (28.2%) of 10th grade students met concordance through the PSAT/NMSQT
 - 1,456 (18.2%) of 11th grade students met concordance through the PSAT/NMSQT
 - 320 (18.3%) of 12th grade students met concordance through the PSAT/NMSQT

- For 10th and 11th grade students participating in the PSAT/NMSQT, participation rates returned to pre-pandemic levels in 2021-2022 with 84.2 % of 10th grade students and 39.8% of 11th grade students participating in 2021-2022^{1,2}. Eleventh grade students must pay to test or have their school pay to test, so their participation rates are always consequently lower than 10th grade students' participation rates. Additionally, 85.8% of 9th grade students and 8.1% of 12th grade students participated in 2021-2022 (see Appendix A).
- White students out-participated Black and Hispanic students in both 9th and 10th grade with a difference ranging between 1.5 to 3 percentage points between White and the minority races. For 11th grade student, Black student (42%) participation was 6 percentage points higher than Hispanic students (36%) and 3 percentage points higher than White students (39%) (see Appendix B).
- Twenty-three percent of 10th grade students and 26.8% of 11th grade students who took the PSAT/NMSQT met both the Evidence-Based Reading and Writing (EBRW) and Math benchmarks³. For 10th grade students, 55.3% met the EBRW benchmark and 24.9% met the Math benchmark. Whereas 59.7% of 11th grade students met the EBRW benchmark and 27.5% met the Math benchmark (see Appendix C).
- There was a performance gap between White students and minority students in 10th and 11th grade with White students scoring higher than Black and Hispanic students in both EBRW and Math. (see Table 1 and Appendix C for expanded data).
- Additionally, there was a performance gap between females and males for 10th and 11th grade students, with females outpacing males in EBRW, while males outpaced females in Math (see Table 1 and Appendix G for expanded data).

- District 10th grade scores on the PSAT/NMSQT were lower than state and national scores. District 11th grade scores were higher than the state but lower than the national mean (See Appendix D).
 - District scores on both EBRW and Math for 10th grade students were lower than state scores and national scores.
 - Scores on EBRW for 11th grade students were higher than state scores but lower than national scores. 11th grade math scores were lower than both the state and national scores.
